

CONNECTING WITH FAMILY WHEN IT MATTERS MOST

As our lives get busier and the distances between loved ones grow, its not always possible to be where you would like to be.

One Room Funeral Webcasting closes the distance and enables family and friends to be part of a memorial service either live while the service happens or later, when time permits.

WHAT IS ONE ROOM?

One Room is a fully automated webcasting system that records and streams live. Through a simple email invitation Family and friends are able to access the service. With 90 days access to the archived service a One Room webcast provides an opportunity for a private farewell at any time and any place. With a single click viewing a One Room service is simple.

Live Viewing
